## Question

# E

Question B3a6. Does the proposal involve any discharges of waste materials to surface waters?

# L

Include waste or contaminants associated with industrial wastewater; domestic sewerage; agricultural runoff; stormwater drainage from parking lots, equipment storage areas, chemically-treated lawns and landscaping; etc. Describe the source, the likely contaminants, and quantities if known.

# P

Waste materials means hot or very cold water, sediments, chemical by-products, wash water, sewage, stormwater and other pollutants.

Discharge includes seeping or dripping of hot or very cold water; sediment filled water, controlled runoff, or liquid by-products of an activity, such as bore hole drilling waste products.

Water bodies include year round and seasonal streams, saltwater, lakes, ponds, wetlands, domestic water intakes, or any forested or un-forested wetlands on the site or down stream/down slope. Please identify possible fish bearing streams and note that an intermittent stream might have fish present for a few weeks or months of the year during periods of high flow.
